

AIAM

The Italian Association of Agrometeorology (AIAM), founded in 1997, promotes and supports agrometeorologists while fostering the dissemination of knowledge in agrometeorology and agroclimatology.

Over the years, it has strengthened the connection between academic research and operational services, encouraging studies on key agrometeorological topics at both farm and territorial levels

ITALIAN JOURNAL OF AGROMETEOROLOGY

The Italian Journal of Agrometeorology (IJAM) is the official publication of the Italian Association of Agrometeorology (AIAM). As an international, open access, peer-reviewed journal, it advances research in agrometeorology and agroclimatology, fostering scientific exchange on the interactions between meteorological factors and agricultural systems.

AIMS AND SCOPE

IJAam publishes original papers in the field of agrometeorology, covering a wide range of topics, including ecophysiology, phenology, crop growth and yield, plant pathology, entomology, livestock welfare, soil physics, hydrology, micrometeorology, climate and crop modeling, remote sensing, GIS applications, precision agriculture, scientific dissemination, and decision support services for farmers.

JOURNAL STATISTICS since 2019

269 submissions received (approx. 44/year)

77 articles published (approx. 15/year)

Acceptance rate: 28%

Desk rejection rate: 30%

Average time to first

editorial decision: 39 days

JUST ACCEPTED

Just Accepted manuscripts are posted online prior to technical editing, formatting for publication and author proofing and are immediately citable through a permanent DOI.

This service provides prompt access to the latest research findings, enhancing the dissemination of scientific information for the benefit of the research community.
